Monthly Revenue Trend (2016–2018)

How does Olist perform over months after 3 years?

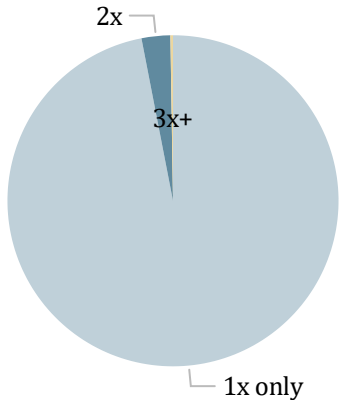

Revenue: New vs Returning Customers

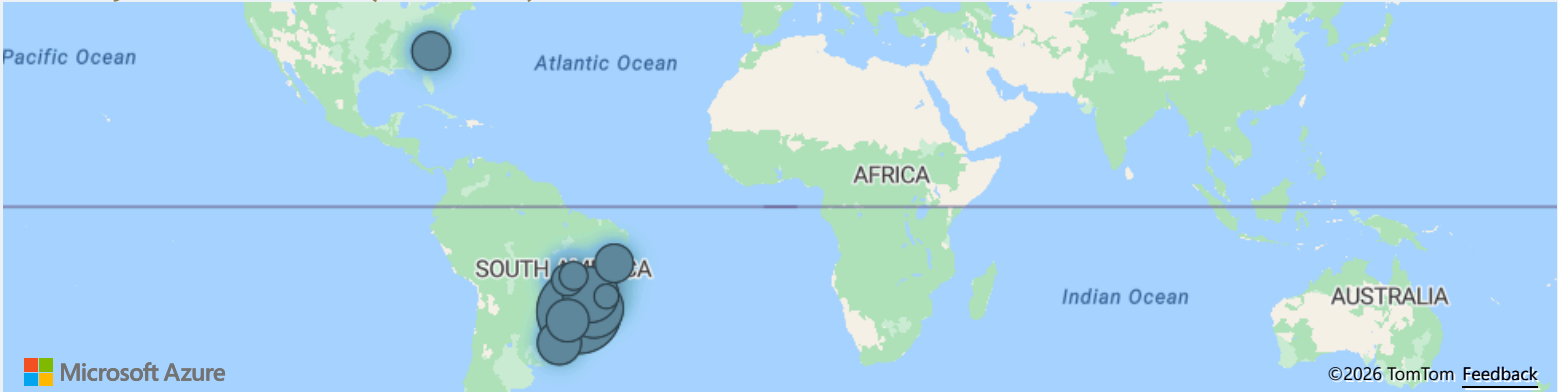

Returning customers contribute only near 7% to total GMV

Purchase Frequency

Monthly Revenue Trend (2016–2018)

- Total Revenue showcased strong **market expansion** from 2016 to 2018.
- **Average Order Value** (AOV) stands solid at R\$206.93 across 27 states, indicating healthy consumer purchasing power.
- There is an extreme **customer leak**, with 96.95% of buyers buying only once.
- **Returning buyers** represent only 3.05% of customers but generate 6.93% of total GMV, indicating significantly higher lifetime value per customer

● %Total Orders ● %Total Revenue

High-revenue categories have the highest single-purchase rate

- **Delivery delays** are not the root cause of low retention. Over 73% of perfectly on-time buyers still never return.
- **10×** plan buyers account for only **5% of orders** but generate **15% of revenue**.
- **Repeat purchases** are entirely structural, shifting away from low-value Health Beauty toward high-ticket lifestyle investments like Computers Accessories and Furniture Decor.

Total	1,372K	1,469K	1,501K	4,342K

Category Portfolio, Repeat Potential vs Revenue

- Core revenue is locked in **long-lifecycle, durable categories** (Bed Bath Table, Furniture).
- While acquisition marketing is highly effective (driving 11.7K New Customers), the platform **lacks post-purchase engagement** to bridge the gap between transactional buyers and the elite Champions pool (only 5.9K).
- Repeat rates** are low across all categories, typical for e-commerce platforms without loyalty programmes.
